He sings songs that teaches everyone about blockchain.

Benny - Sophie - Riley

Alongside Andy completing the crew:
Benny on keyz
Sophie the guitar-shredder
Riley our favorite beatz boy

Leading the $BAM Revolution

This isn't just a token—it's a music-powered crypto movement.

Bambitz: Tokenomics-Driven Music Ecosystem

Artists' Earnings Challenge

Artists currently earn only fractions of a cent per stream.

This financial model limits their ability to grow their careers.

Fans' Limited Financial Role

Fans have minimal financial stake in the artists' growth.

This disconnect reduces their engagement and investment in the music ecosystem.

Bambitz Solution

Bambitz connects with their fans through tokenomics and music/entertainment.

This model transforms streams and sales into shared value.

With its #Listen2Burn mechanism every stream contributes.

Global Music Market Overview

Projected Streams in 2024

4.8T

4.8 trillion streams projected in 2024 (AP News)

Global Streaming Revenue in 2023

$19.3B

$19.3 billion global streaming revenue in 2023

Worldwide Paid Subscribers

667M

667 million paid subscribers worldwide

Total Listeners Globally

2B

Approximately 2 billion total listeners

Buyers of Downloads and Merchandise

40M

Over 40 million buyers of downloads, direct sales, and merchandise

Tokenomics Structure of Bambitz

1B

Total Supply of $BAM Tokens

Bambitz has a total supply of 1 billion $BAM tokens.

24%

Tokens Locked in Vesting

24% of $BAM tokens are locked in vesting for 12 months.

220M

Liquidity Pool Allocation

22% of $BAM tokens are allocated to the liquidity pool, totaling 220 million tokens.

540M

Tokens in Circulation

54% of $BAM tokens are currently in circulation, amounting to 540 million tokens.

$BAM Token Dynamics

AMM Pool Formula

Bambitz uses an AMM pool governed by the formula $x \cdot y = k$.

This formula ensures a balance between token and USD quantities in the pool.

Token Buyer Dynamics

Token buyers add SOL to the pool and remove tokens, causing price increases.

This mechanism directly impacts the token's market value.

Listen2Burn Mechanism and Feedback Loop

Burns involve buying tokens from the pool and destroying them, shrinking supply.

These mechanisms create a feedback loop where increased demand and reduced supply drive token price appreciation.

$BAM Revenue Token-Flow Model

Revenue Generation from Streams

50% of revenue ($0.0035 per stream) is allocated to token burning, reducing supply.

50% + token allocation to Artist

.

Token Buyer Conversion Rate

0.1% of streams convert into token buyers.

Average spend per buyer is $10.

Impact of Token Purchases

Purchases reduce liquidity pool supply.

This creates upward price pressure.

Listener Purchase Dynamics

Listeners contribute to revenue by listening or purchasing tracks.

Revenue allocation includes token burning to manage supply.

Economic Effects of Token Flow

Token burning reduces supply, influencing market dynamics.

Upward price pressure is a result of reduced liquidity pool supply.

$BAM Holders Value Proposition

Value for Bambitz

Bambitz delivers increased revenues and deeper fan engagement.

This increases the adoption of the BAM token..

Benefits for Fans

Fans & BAM holders gain ownership stakes and financial upside as music gains listeners.

This creates a direct connection between fans and Bambitz' success.

Ecosystem Sustainability

Sustainable tokenomics with a transparent burn model ensures long-term viability.

This builds trust across the community

#LISTEN2BURN

Photo Credit: Shot by Cam Major at The Orange Lounge Recording Studios

Though only in his 30s, music producer and songwriter Rich Pilkington has already enjoyed a career marked by spectacular moments. He has rubbed shoulders with world-acclaimed artists, writing and producing for a variety of genres, ranging from C-Pop star Zhang Zhehan to electronic music artist and DJ Mark with a K.

Mark's smash hit 'Warrior,' written and vocal produced by Rich, has grossed nearly 50 million streams across streaming platforms and has been performed at shows and festivals globally, including at Tomorrowland, one of the most reputable EDM festivals, where the music video for 'Warrior' was shot.

Simulation Results and Market Impact

500K Streams

Steady price growth with healthy liquidity pool depth.

50M Streams

Market cap reaches approximately $42 million

100M Streams

Exponential price growth, resulting in a parabolic price surge.
$163M Market Cap

Global Opportunity with Bambitz

Market Capture Potential
